

Drowning is currently the highest cause of death in young children, and Brain Tumours are on the increase! Hills Swimming is helping the fight against both these potential killers of our children!

Not many people know that brain tumours are the most common, life-threatening tumours in children. What's more, behind Leukemia, they're the most common of all childhood cancers. Perhaps the most worrying thing is unlike so many other forms of cancer, the incidence of brain cancer is increasing.

Whilst advances in neurosurgery are giving many people a better chance to beat brain tumours, still more can and must be done.

The **Cure for Life Foundation™** was established in 2003 by world-renowned neurosurgeon, Dr Charles Teo, to help fund advancements in the treatment of brain cancer, hopefully one day leading to a cure.

The more funds that are raised, the more the Cure for Life Foundation™ can do to help find a cure for this terrible condition.

Please help us find a cure

Hills Swimming is raising funds for Cure for Life Foundation !

Help by sponsoring a Crane for our Window

or sponsor owner Deny Zancanaro as he shaves his head for a cure

(Sponsor Cranes at reception or sponsor Deny online at www.everydayhero.com.au)

Legend has it that if 1,000 origami cranes are made a wish will be granted
– let's all wish for a cure!
